

SQL QUESTIONS FOR PRODUCT DATASET

1.What is the average profit?

```
SELECT AVG(profit)
FROM sales_v1;
```

Output

	AVG(profit)
	24,133.86

2. Which product has the highest **total sales**?

```
SELECT product, SUM(sales) AS total_sales
FROM sales_v1
GROUP BY product
ORDER BY total_sales DESC
LIMIT 1;
```

Output

product	total_sales
Paseo	33,011,143.95

3.Which segment has the highest **total sales and total profit**?

```
SELECT segment,
       SUM(sales) AS total_sales,
       SUM(profit) AS total_profit
FROM sales_v1
GROUP BY segment
ORDER BY total_sales DESC, total_profit DESC
LIMIT 1;
```

Output

segment	total_sales	total_profit
Government	52,504,260.67	11,388,173.17

4. Which country has the highest **total sales** and **total profit**?

```
SELECT country,
       SUM(sales) AS total_sales,
       SUM(profit) AS total_profit
FROM sales_v1
GROUP BY country
ORDER BY total_sales DESC, total_profit DESC
LIMIT 1;
```

Output

country	total_sales	total_profit
USA	25,029,830.00	2,995,540.67

5. Which month has the highest **total sales**?

```
SELECT month,
       SUM(sales) AS total_sales
FROM sales_v1
GROUP BY month
ORDER BY total_sales DESC
LIMIT 1;
```

Your dataset has `Month Name`, so using that field, the output is:

Month	total_sales
October	21,671,431.02
