

SUMMARY OF THE SALES REPORT

DATA : SALES DATA YEAR 2013-2014

Analysis of the Financial Sample dataset shows average sale value of ₹169,609, though the median of ₹35,540 reveals that most transactions are much smaller — a small number of large deals skew the overall average. USA and paseo generate the highest total sales, while Government segment shows the lowest discounting and correspondingly stronger profit margins. products show positive profit and meaningful sales volume, Higher discount levels appear to be associated with weaker profitability in the analyzed data and should be investigated further.

Recommendation:

- Maintain focus on the Government segment while investigating the factors contributing to its stronger profitability.
- Review October sales drivers and evaluate whether similar campaigns or purchasing patterns can be leveraged in other months.
